Dustless Abrasive Blasting

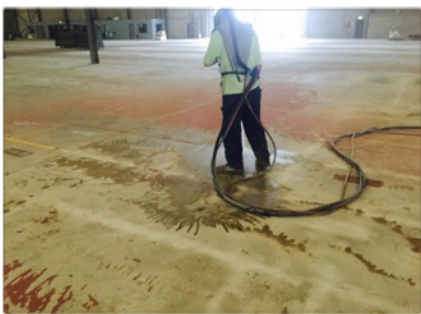

Weis Contractors uses a State Of The Art Dustless Blasting System.

What does this mean for our client?

We can blast any surface with minimal dust. With the introduction of water into the blast pot we have not only eliminated most dust but reduce abrasive consumption as well. The simplest way to explain how this works is to throw a hand full of dry abrasive at the wall and it will do very little but throw a handful of wet abrasive at the wall it will hit the wall harder due to the increase in volume. We have used this blast method on various projects including heritage listed building. This method is ideal in removing line-marking from internal and external floors of properties.

Where necessary Weis Contractors also does Soda Blasting and Dry Abrasive Blasting
